ASSOCIATION AND CLINICAL

Hahnemann Medical College

THE ASSOCIATION

OF THE ASSOCIATION

SECTION OF 1888-89

AND THE ASSOCIATION

ANNUAL ANNOUNCEMENT

AND

CATALOGUE

OF

The Hahnemann Medical College

OF

PHILADELPHIA.

Chartered by an Act of the Legislature of Pennsylvania,

APPROVED, MAY 2d, 1853.

The following is extracted from said Act: The said College to have the power of granting degrees and giving diplomas to all those who may comply with the rules and regulations thereof, and also to give a summer and winter course of Lectures on the Science of Medicine; the said College to have all the immunities, rights and privileges granted to the Allopathic Colleges in the State of Pennsylvania, no inconsistent with the Laws and Constitution thereof.

SESSION OF 1868-69.

PHILADELPHIA:

KING & BAIRD, PRINTERS, 607 SANSOM STREET.

1868.

FACULTY OF MEDICINE.

- CONSTANTINE HERING, M. D., . . 114 North Twelfth Street,
Professor of Institutes and Materia Medica.
- CHAS. G. RAUE, M. D., . . . 121 North Tenth Street,
Professor of Practice of Medicine, Special Pathology and Diagnosis.
- JOHN C. MORGAN, M. D., . . . 1700 Chestnut Street,
Professor of Surgery.
- HENRY NOAH MARTIN, M. D., . 526 Spruce Street,
Professor of Clinical Medicine.
- RICHARD KOCH, M. D., . . . 33 North Twelfth Street,
Professor of Physiology, General Pathology, and Microscopic Anatomy.
- A. R. THOMAS, M. D., . . . 937 Spruce Street,
Professor of Anatomy.
- LEMUEL STEPHENS, M. D., . . 616 Sansom Street,
Professor of Natural Philosophy, Chemistry, and Toxicology.
- O. B. GAUSE, M. D., . . N. W. corner Twelfth and Arch Streets,
Professor of Midwifery and Diseases of Women and Children.
- CHAS. H. VON TAGEN, M. D., . 1135 Spruce Street,
Demonstrator and Lecturer on Surgical Anatomy.
- H. RYLAND WARRINER, Esq., . 26 North Seventh Street,
Lecturer on Forensic Medicine.
- F. E. BERICKE, M. D., . . . 635 Arch Street,
Lecturer on Homœopathic Pharmaceutics.
- W. J. EARHARDT, M. D., . . . 125 North Seventeenth Street,
Chief Dispensary Physician.
- J. M. HABEL, M. D.,
Librarian.
- WILLIAM WEAR,
Janitor.

TEXT BOOKS.

INSTITUTES AND MATERIA MEDICA.

Hahnemann's Works.
Gross' Comparative Materia Medica;
Lippe's Text Book.

PRACTICE, SPECIAL PATHOLOGY AND DIAGNOSIS.

Raue's Pathology.
Da Costa on Diagnosis.
Hughes on Auscultation and Percussion.

SURGERY.

Franklin's, Erischsen's or Gross' Surgery.
Canniff's Principles of Surgery.

MIDWIFERY AND DISEASES OF WOMEN AND CHILDREN.

Guernsey's Obstetrics and Diseases of Woman and Infants.
Cazeaux's Midwifery.
Davis on Parturition.
Williamson, Leadam, on Diseases of Woman and Children.

PHYSIOLOGY, GENERAL PATHOLOGY AND MICROSCOPIC ANATOMY.

Carpenter's Dalton's or Flint's Physiology.
Simon's General Pathology.

ANATOMY.

Gray's or Wilson's Anatomy.
Allen's Dissector.

NATURAL PHILOSOPHY, CHEMISTRY, AND TOXICOLOGY.

Young's Chemistry.

Hahnemann Medical College.

The Trustees take this occasion to present their thanks to the medical profession for their generous support of our institution during the first year of its existence.

Its success and permanency may now be considered as demonstrated. The number of students attending the lectures at its first session is unprecedented in the annals of similar institutions, and indicates the want of a *medical school of the first order*, combining, to the fullest extent, thorough *didactic* with *demonstrative* teaching.

The present *permanent* organization of the College gives assurance that that want will continue to be supplied.

Plan of the Organization.

The Homœopathic law of cure forms the basis of its teaching; but while strict adherence to pure Homœopathy is inculcated, and the principle of the *minimum* dose is both taught and practised in the clinic, the student must judge for himself what that dose should be in each individual case.

It is a peculiar feature of this institution that its Faculty and Trustees are elected for life; and the professors can be removed only by death, resignation, or impeachment. The profession are thus assured that each incumbent of a chair, realizing that he has a life interest in the advancement of the particular branch intrusted to his care, is encouraged to put forth his utmost efforts to attain the highest excellence as an instructor.

Its Board of Curators, under certain conditions,* may examine candidates for graduation; and acts as a Board of Council in the affairs of the College. It is proper to add that the Curators have no interest in the institution, inconsistent with *the advancement of medical education*, and the welfare of the medical profession. To this end, it will be the aim of the Faculty and Curators, to render the course of instruction in the Hahnemann Medical College *eminently practical, demonstrative and complete*, and to give to the Institution committed to their care, the *highest rank* as a school of sound medical learning, and practical acquirement.

The Trustees have been able to secure the services, in addition to those of DR. VON TAGEN and MR. WARRINER, who lectured in the past session, of F. E. BÆRICKE, M. D., whose long experience as a Homœopathic Pharmaceutist, renders him eminently qualified to lecture on that important branch. With this addition they confidently offer to students *unsurpassed facilities for the acquisition of medical knowledge*.

Museum and Library.

The Museum is amply provided with materials for demonstration before the class, and is well fitted for illustrating the various branches. Besides the usual osseous, ligamentous, muscular, vascular, nervous, and other preparations for anatomical demonstration, it contains a large number of wet preparations relating to pathology, obstetrics, surgery, &c., an ample collection of diseased bones, calculi, models, and an extensive series of paintings and engrav-

* CURATORS.—The members of the *Board of Curators* shall attend the meetings of the Medical Faculty, when invited by their chairman so to do; they shall, on the invitation of the President of the College, attend the joint-meetings of the two Boards of Trustees; and may take part in the deliberations of the same; but shall not have the right to vote, except on questions concerning graduation, in cases where candidates have demanded their action. Any candidate shall have the privilege of making such demand; and in such case shall be examined by them, in the stead of any portion of the Faculty specified therein.

ings, representing healthy and morbid parts, fractures, dislocations, tumors, &c., and the surgical operations that may be necessary for their relief.

The Museum is constantly receiving fresh accessions, and we shall be obliged, before the coming session, to very much enlarge its present capacity.

The Library now numbers over six hundred volumes of standard works, and arrangements will be so made that students can take books to their homes for study. We are under great obligations to the physicians of this city and vicinity for valuable contributions to the Library, Museum, and Apparatus.

Clinical Instruction.

The Trustees feel convinced of the vital importance of *practical knowledge* in medical education, and they, with the Faculty, determined at the very commencement of their operations, whilst giving due importance to *didactic*, to make *demonstrative teaching* the *basis* of their system. This object has been in some measure attained, during the past session, both in the medical and surgical branches. Senior students have been amply supplied with patients to attend at their homes under the direction of the Professors.

The great advantages of this arrangement, so far as clinical teaching is concerned, are obvious. It is sufficient to say *that they have been found to be even greater than had been anticipated.*

Institutes and Materia Medica.

BY C. HERING, M. D.

The Professor of Institutes and Materia Medica devotes one lecture in each week to general principles, and three lectures to Materia Medica and Symptomatology. The department of Materia Medica is illustrated by the finest colored engravings, and by drugs in substance.

The important characteristics or corroborated symptoms of all our drugs are fully given, with their application to different pathological states.

Practice of Medicine, Special Pathology and Diagnosis.

BY CHARLES G. RAUE, M. D.

The plan of the Institution embraces, as one of its most prominent objects, not only increased facilities for bed-side instruction, it also comprehends as far as possible, the union of *practical* with didactic teaching in *all* the branches of medical education. For this end, the lectures on Practice of Medicine, Special Pathology and Diagnosis, will be illustrated by actual cases of disease, and by recent morbid specimens. The practical study of *Auscultation* and *Percussion*, forms a most important means of instruction in this department.

Surgery.

BY JOHN C. MORGAN, M. D.

The lectures on *Surgery* are made *demonstrative* by associating clinical with didactic teaching, each subject considered being illustrated and impressed as far as practicable by the examination of such cases as bear upon the topic under consideration, in the presence of the class. The different operations are exhibited on the dead subject, and opportunity given for witnessing many of them upon patients in the Institution. Students are also invited to practice operations upon the cadaver under the direction of the Professor.

The examination of the interior of the eye, the ear, the nose, the larynx, &c., by the use of the ophthalmoscope, laryngoscope, &c., will be taught and demonstrated.

Clinical Medicine.

BY HENRY NOAH MARTIN, M. D.

The *Clinical Professor*, after examining patients to be prescribed for before the class, gives a reason for every conclusion, and for every prescription. The diagnosis, prognosis, and therapeutics are thus intimately elucidated. The

clinical course affords to the student an extensive field for witnessing and participating in the practical exercise of his profession.

Physiology, General Pathology, and Microscopic Anatomy.

BY RICHARD KOCH, M. D.

The lectures on *Physiology* and *Microscopic Anatomy* are demonstrative; *vivi-sections* and other experimental illustrations being employed by the Professor, who has, during the past session, given more numerous *vivi-sections* than have ever before been given in any medical institution in this city. By the aid of two powerful microscopes he has been able to illustrate his subject at the close of each lecture.

Anatomy.

BY A. R. THOMAS, M. D.

The Lectures on *Anatomy* are illustrated by the fresh subject, models and preparations. Keeping in mind that the chief use of *Anatomy* is its application to practice, the Professor gives special attention to the *topographical Anatomy* of the organs of the body, which is so important to the practitioner.

Chemistry.

BY LEMUEL STEPHENS, M. D.

In the department of Chemistry, while a full course on the principles of the science will be amply illustrated by the appropriate experiments, recognizing the necessity of a thorough acquaintance with the doctrine of poisons, the Professor will fully and explicitly illustrate this important branch of instruction by giving all useful experiments, tests, and antidotes before the class.

Midwifery and Diseases of Women and Children.

BY O. B. GAUSE, M.D.

The Professor of *Obstetrics and Diseases of Women and Children*, connects an Obstetrical Dispensary with his de-

partment, which offers to the student every facility for private examinations with the speculum, etc. He will also entrust the conduct of obstetrical and other cases in his department, to the senior students under his supervision.

In all cases of doubt or peril, the Professor promptly gives his counsel and personal attendance.

In addition to the lectures by the Faculty, instruction will be given in the following branches:

Forensic Medicine.

BY H. RYLAND WARRINER, ESQ.

In this necessary branch of medicine we have secured the continued services of MR. WARRINER, who has won a high reputation as a lecturer on this important subject.

Surgical Anatomy.

BY C. H. VON TAGEN, M. D.

DR. VON TAGEN will illustrate this interesting and important branch by demonstrations upon the cadaver.

We believe his past course of lectures has given eminent satisfaction.

Homœopathic Pharmaceutics.

BY F. E. BERICKE, M. D.

The knowledge of the preparation of medicines is important to every physician, and especially so to the country practitioner.

DR. BERICKE will give a course similar to the one delivered during the last session.

Dissections.

We confidently assert that opportunities afforded at this institution for a thorough knowledge of practical Anatomy, are not surpassed by any other College.

The Legislature of this State having enacted a law whereby dissection is legalized, the expense of material is reduced to mere cost of transportation.

The Preliminary Course

of the last session proved so great a success, we shall again open the College for a preliminary course of lectures September 28th, 1868. This course will be gratuitous.

Degrees.

The following extracts from the By-Laws, regarding special degrees, abolishes the too prevalent practice of granting such upon insufficient grounds, whilst meritorious physicians are placed in a position to secure the desired honors:

XXVII. Honorary degrees shall be conferred on distinguished practitioners, according to the recommendation of the Faculty and Board of Curators.

XXVIII. *Special Degrees* shall be conferred on such candidates only as shall have been examined by the Faculty of this College, unless they shall be graduates of some other respectable Medical College, when the Degree may be conferred upon the certificate of a duly appointed examining board of a regularly organized county or State Homœopathic Medical Society, and under seal of the same, accompanied by satisfactory testimonials of good moral character and professional standing. A thesis will be required of every candidate for a special degree.

.It being the fixed purpose of the Faculty and Trustees of this College to elevate the standard of Homœopathic medical education, we earnestly request physicians receiving students into their offices to ascertain that such have proper literary qualifications, in order that we may be spared the embarrassment of rejecting them as candidates for graduation on the ground of deficiency in this respect.

The following charitable medical institutions are open to students free of charge, or accessible to them by introduction through the Faculty of the College.

Hospitals.

Clinical instruction *free* throughout the year is given in the Pennsylvania Hospital, and in the Philadelphia Hospital (Almshouse). The latter institution contains nine hundred beds. Also, at Wills' Hospital for diseases of the eyes and limbs.

The Little Wanderers' Home,

situated on the corner of Tenth and Shippen streets.

There are a large number of Children in this institution, and diseases incident to childhood are not infrequent. Professor MARTIN is one of the attending physicians.

Spring and Summer Course.

In accordance with the expressed desire of many students and physicians, we have decided to have a Spring and Summer course of lectures extending through the months of April, May, and June.

Faculty of Summer Course.

C. HERING, M. D. Conditions and Causes of Disease.

JOHN C. MORGAN, M. D. Diseases of the Eye and Ear.

HENRY NOAH MARTIN, M. D. Clinical Medicine.

RICHARD KOCH, M. D. Diseases of the Mind; also, Microscopic Anatomy.

A. R. THOMAS, M. D. Comparative Anatomy.

O. B. GAUSE, M. D. Diseases of Women and Children.

C. H. VON TAGEN, M. D. Surgical Anatomy.

..... Botany.

The College Dispensary is open, and in successful operation.

The Surgical, Medical, and Obstetrical clinics will be opened on the first of September. The Anatomical rooms will also be opened at the same time.

The Introductory Address will be delivered by Professor A. R. THOMAS, at twelve o'clock, noon, of the second Monday in October; and the course of lectures will begin at ten o'clock the next morning.

The Registrar will be prepared to give to the students information relative to board, &c.

All letters relative to the affairs of the College should be addressed either to the Dean or Registrar.

JASON L. FENIMORE,

President.

JOHN A. MARSHALL, *Secretary.*

REGULATIONS OF THE COLLEGE.

The regular Course of Lectures will begin on the second Monday in October, and end about the first of March ensuing.

To constitute a full course, the full ticket must be taken by the first Monday in November.

Students who have attended two full courses of instruction in this institution, shall be admitted to the subsequent courses of the College without further charge.

Students may become candidates for Graduation who have attended two full courses of instruction in this institution; or one course only, in case they have attended one or more full courses in another respectable Medical College.

A candidate must be at least twenty-one years of age, of good moral character, possessed of sufficient preliminary education, have applied himself to the study of medicine for three years, and have been the private pupil, for two years, of a respectable practitioner of medicine; and must have attended at least one course of Practical Anatomy.

When applying for examination, he must first exhibit his ticket to the Registrar of the Faculty, or give other satisfactory evidence of having complied with the regulations.

He must on or before the 1st of February, deliver to the Registrar of the Faculty an Essay or Thesis, in his own handwriting, composed by himself, on some medical subject, at which time he will pay the fee of graduation; if rejected, the money will be refunded.

The Thesis may be written in English, Latin, German, French or Spanish, at the option of the candidates, and must be written on one side of the sheet only.

The Examination for graduation will begin about the last of February, and the commencement for conferring the Degrees of the College will be held as soon after the close of the lectures as practicable.

The examination will be conducted in private by each Professor, and the voting, in the case of every candidate, shall be by ballot.

In unsatisfactory cases, the candidate may, with the consent of the Faculty, avail himself of a second examination before the Faculty or the Board of Curators.

Formal notice of each satisfactory examination shall be given by the Dean to the successful candidate, who shall record his name and address upon the register of graduates, with the title of his Thesis.

The names of the successful candidates are to be reported by the Dean to the President of the College, who will communicate such report to the Board of Corporation Trustees, in order that, if confirmed by them, the degree may be conferred.

A successful candidate shall not absent himself from the Public Commencement, without the permission of the Faculty.

A Thesis may be published by the candidate, permission of the Faculty being first obtained.

Address

C. HERING, M. D., DEAN,

No. 114 North Twelfth Street.

Or, RICHARD KOCH, M. D., REGISTRAR,

No. 33 North Twelfth Street.

FEES.

Matriculation, (paid once only; students who have matriculated at the Homœopathic Medical College of Pennsylvania will not be required again to pay the fee in this).....	\$5 00
Practical Anatomy, (ticket perpetual).....	10 00
Graduation.....	30 00
Amount for a full Course of Lectures.....	100 00
For Students who have attended two full courses in other Medical Colleges.....	50 00
For such as have attended one course in other Medical Colleges.....	100 00
Graduates of other Medical Colleges.....	30 00
Graduates of the Homœopathic Medical College of Pennsylvania previous to 1868.....	No charge.
